Skills

JavaScript
Angular 2/4
AngularJS
Node.js

HTML5
CSS3/Sass
NPM
Bootstrap

JSON
C++
Responsive design
TypeScript

Work Experience

Codify Academy - Lead Mentor & Front End Developer

August 2016 - Current

- Lead a team of mentors to guide students in 16 weeks how to use and understand the fundamentals of semantic HTML5, CSS3, Bootstrap, JavaScript, jQuery, version control (Git), JSON, and AJAX through project based learning. The curriculum that we teach also introduces how to use AngularJS
- Create projects/web applications for students to replicate or reference
- Teach students how to curate a resume that is suitable and ready for the job application process
- Assist students in searching for entry level developer roles
- Provide 1 on 1 tutoring to ensure students are up to date and can be held accountable for projects/freelance work

Ohlone College - Contract Front End Developer

November 2016 - June 2017

- Complete overhaul of website for Computer Science professor Jon Degallier
- Implementing HTML5 & CSS3 standards
- Writing media queries to support website responsiveness (Desktop to mobile)
- General website maintenance with file uploading and debugging
- Being used by Intro to computer science students at Ohlone College

Austin Gatan Photography - Contract Web Developer

August 2016 - September 2016

- Created a multi-page portfolio website for client
- Developed with minimal bootstrapping to make the website responsive but also unique enough to stand out from other bootstrap websites
- Implemented minimal JS to decrease page load time due to a large amount of high-resolution photos
- Used Magnific Popup plugin for the user to click on any image in the gallery and view it as a modal. The user can move back and forth between the images without leaving the modal view

Namedrop.IO - Contract Front End Developer

June 2016 - September 2016

- Rebuilt front-end using Aurelia and AngularJS into a single-page web application
- Maintained front-end code with ES6 features
